Bagian Anisa

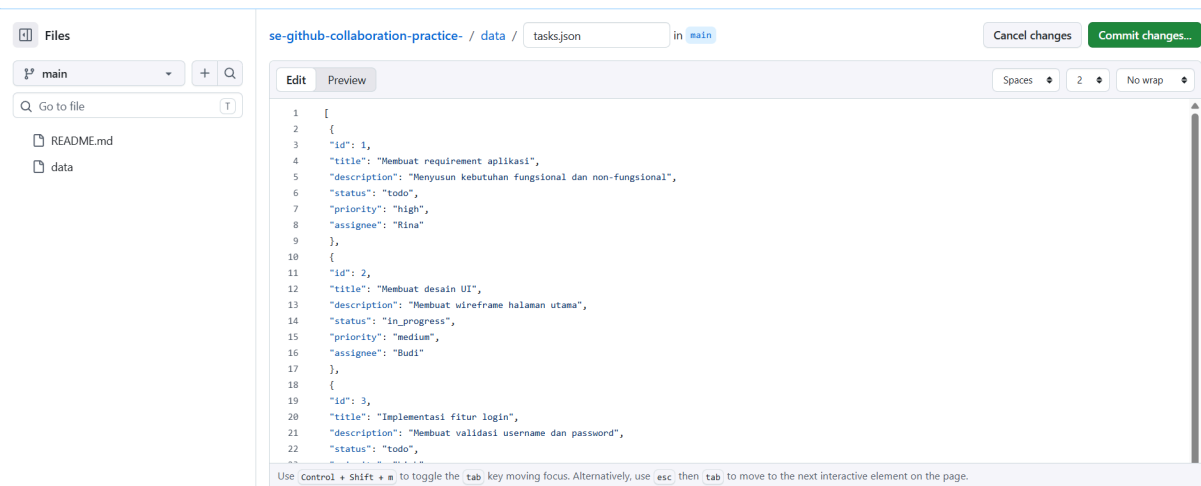

1. Membuat repository

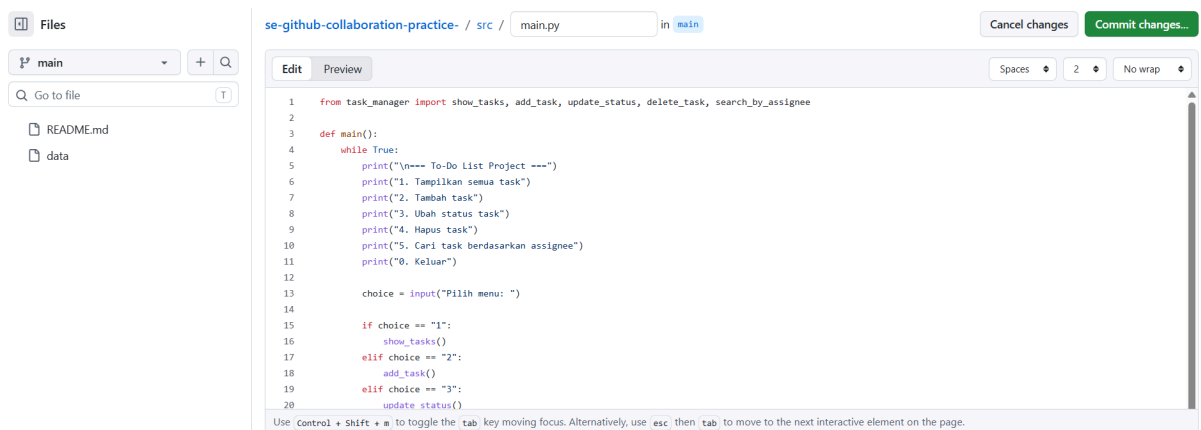

2. Membuat README.md

3. Membuat data/task.json

4. Membuat data/main.py

5. Membuat src/task_manager.py

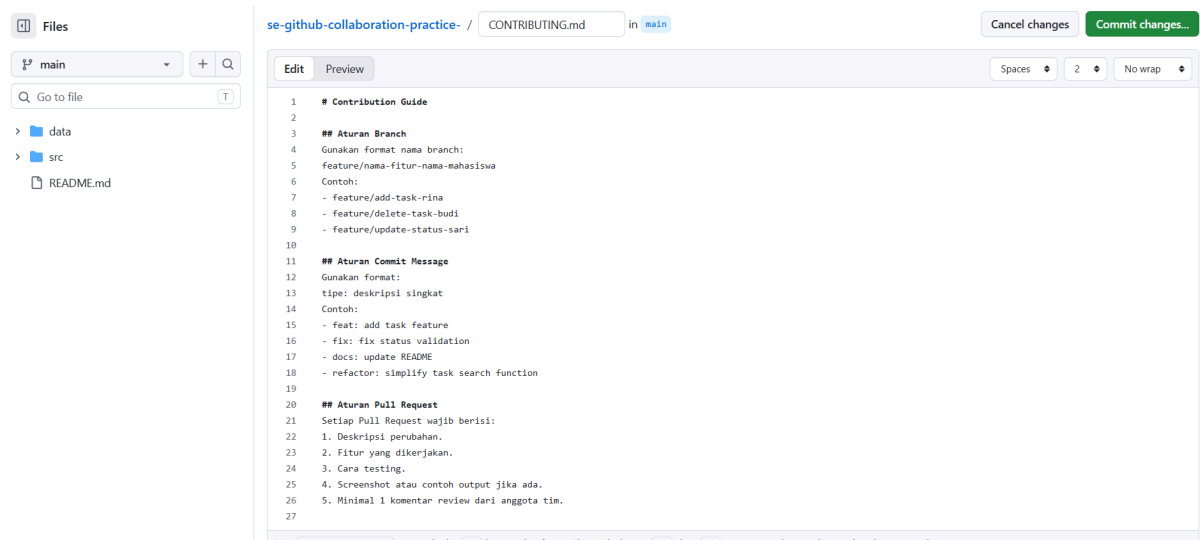

The screenshot shows a code editor interface with a file explorer on the left. The file explorer shows a directory structure with 'data' and 'src' folders. The 'src' folder is selected, and a new file 'task_manager.py' is being created. The code in 'task_manager.py' is as follows:

```
1 import json
2
3 DATA_FILE = "data/tasks.json"
4
5 def load_tasks():
6     with open(DATA_FILE, "r") as file:
7         return json.load(file)
8
9 def save_tasks(tasks):
10    with open(DATA_FILE, "w") as file:
11        json.dump(tasks, file, indent=4)
12
13 def show_tasks():
14     tasks = load_tasks()
15     print("\nDaftar Task:")
16     for task in tasks:
17         print(f"[task['id']]. {task['title']} | Status: {task['status']} | PIC: {task['assignee']}")
18
19 def add_task():
20     tasks = load_tasks()
```

At the bottom of the editor, there is a note: "Use Control + Shift + M to toggle the tab key moving focus. Alternatively, use esc then tab to move to the next interactive element on the page."

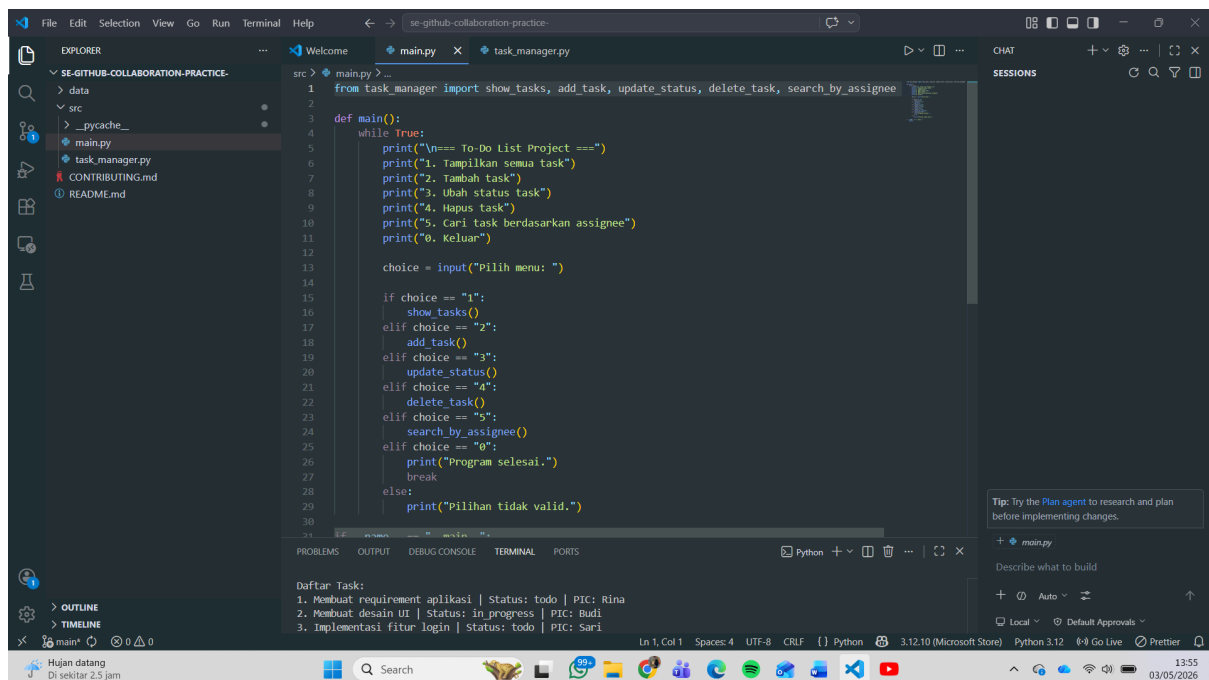

6. Membuat CONTRIBUTING.md

The screenshot shows a code editor interface with a file explorer on the left. The file explorer shows a directory structure with 'data' and 'src' folders. The 'CONTRIBUTING.md' file is being created in the root directory. The content of 'CONTRIBUTING.md' is as follows:

```
1 # Contribution Guide
2
3 ## Aturan Branch
4 Gunakan format nama branch:
5 feature/nama-fitur-nama-mahasiswa
6 Contoh:
7 - feature/add-task-rina
8 - feature/delete-task-budi
9 - feature/update-status-sari
10
11 ## Aturan Commit Message
12 Gunakan format:
13 tipe: deskripsi singkat
14 Contoh:
15 - feat: add task feature
16 - fix: fix status validation
17 - docs: update README
18 - refactor: simplify task search function
19
20 ## Aturan Pull Request
21 Setiap Pull Request wajib berisi:
22 1. Deskripsi perubahan.
23 2. Fitur yang dikerjakan.
24 3. Cara testing.
25 4. Screenshot atau contoh output jika ada.
26 5. Minimal 1 komentar review dari anggota tim.
27
```

7. Clone Repository ke VSC

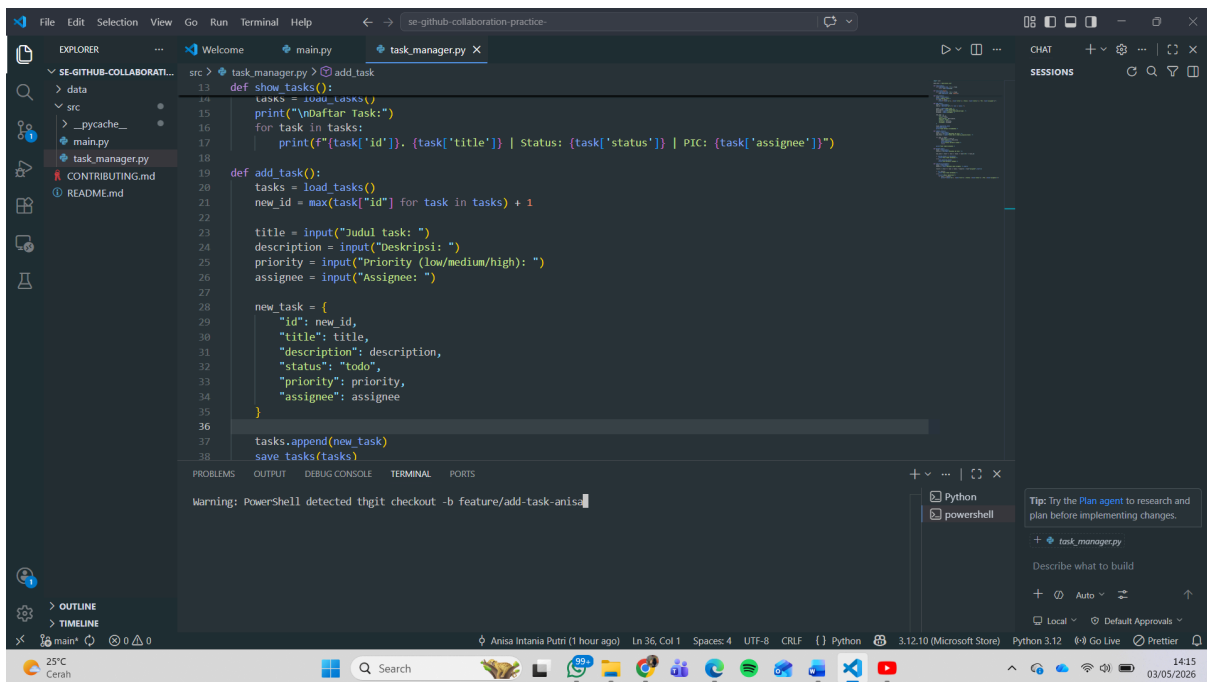

The screenshot shows the Visual Studio Code interface with the 'se-github-collaboration-practice' repository cloned. The Explorer view on the left shows the file structure. The main editor shows the 'task_manager.py' file with the following code:

```
1 from task_manager import show_tasks, add_task, update_status, delete_task, search_by_assignee
2
3 def main():
4     while True:
5         print("\n== To-Do List Project ==")
6         print("1. Tampilkan semua task")
7         print("2. Tambah task")
8         print("3. Ubah status task")
9         print("4. Hapus task")
10        print("5. Cari task berdasarkan assignee")
11        print("0. Keluar")
12
13        choice = input("Pilih menu: ")
14
15        if choice == "1":
16            show_tasks()
17        elif choice == "2":
18            add_task()
19        elif choice == "3":
20            update_status()
21        elif choice == "4":
22            delete_task()
23        elif choice == "5":
24            search_by_assignee()
25        elif choice == "0":
26            print("Program selesai.")
27            break
28        else:
29            print("Pilihan tidak valid.")
30
```

The bottom of the editor shows the 'Daftar Task:' section with a list of tasks:

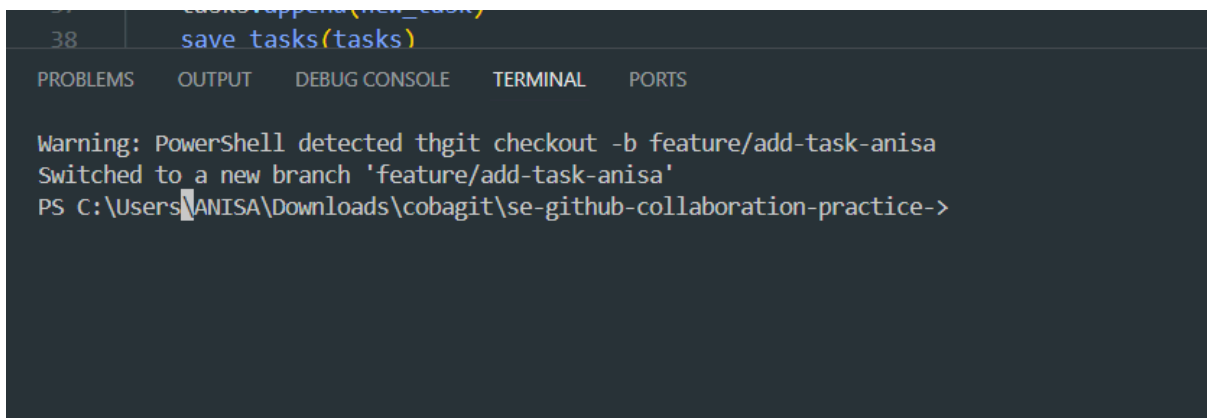

```
Daftar Task:
1. Membuat requirement aplikasi | Status: todo | PIC: Rina
2. Membuat desain UI | Status: in progress | PIC: Budi
3. Implementasi fitur login | Status: todo | PIC: Sari
```

8. Branch

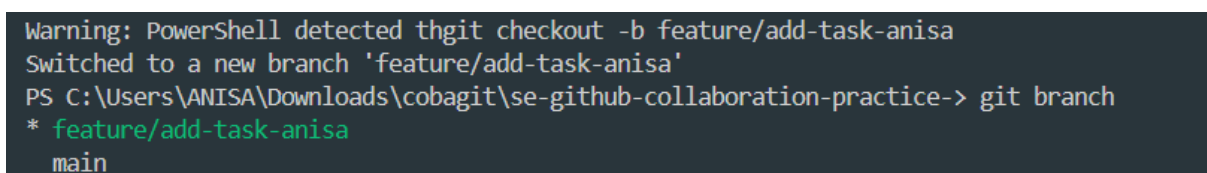

The screenshot shows the Visual Studio Code editor with the file `task_manager.py` open. The code defines a `show_tasks()` function and an `add_task()` function. The `add_task()` function prompts the user for task details and appends a new task to a list. The terminal window at the bottom shows a warning message: "Warning: PowerShell detected thgit checkout -b feature/add-task-anisa".

9. New branch

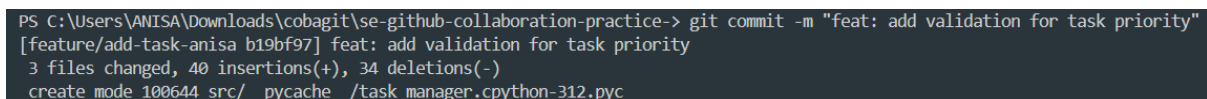

The terminal window shows the command `git checkout -b feature/add-task-anisa` being executed. The output indicates that a new branch has been created and the user has been switched to it.

10. Check branch

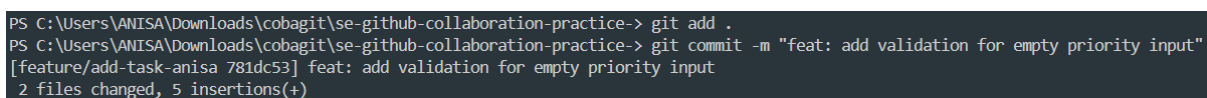

The terminal window shows the command `git branch` being executed. The output lists the current branch, `feature/add-task-anisa`, and the default branch, `main`.

11. Git commit 1

The terminal window shows the command `git commit -m "feat: add validation for task priority"` being executed. The output indicates that the commit was successful and shows the files changed and the commit hash.

12. Git commit 2

The terminal window shows the command `git add .` being executed, followed by `git commit -m "feat: add validation for empty priority input"`. The output indicates that the files were added and the commit was successful.

13. Push to github

pull request

The screenshot shows a GitHub Pull Request (PR) titled "Feature validasi status teesa #3". The PR is open and is being reviewed by a collaborator named shzsaa. The PR description states "No description provided." and shows a commit history with two commits: "menambahkan validasi status task" (commit 01a988b) and "menambahkan validasi input id task" (commit bcef796). The PR is currently in the "Open" state, and the collaborator has commented "No description provided." 1 minute ago. The PR is being merged into the "main" branch from the "feature-validasi-status-teesa" branch. The PR shows 2 commits, 0 checks, and 4 files changed.

C. Review task branch Teesa

The screenshot displays a GitHub pull request interface. On the left, a list of comments is visible: a comment from 'shzsaa' 3 days ago with the text 'No description provided.', a commit by 'shzsaa' adding 2 commits 3 days ago, two commit messages in Indonesian ('menambahkan validasi status task' and 'menambahkan validasi input id task'), a comment from 'BakhtiarIlham' 39 minutes ago stating 'Perubahan sangat bagus dan sudah cocok untuk pengujian', and a comment from 'AnisIntania' 'now' stating 'Validasi status task sudah bagus karena membantu memastikan input status lebih teratur dan sesuai.' On the right, the 'Reviewers' section shows 'AnisIntania' with a 'Request' button. Below this, the 'Assignees' section shows 'No one—assign yourself', 'Labels' shows 'None yet', 'Projects' shows 'None yet', 'Milestone' shows 'No milestone', and 'Development' shows 'Successfully merging this pull request may close these issues.' At the bottom right, the 'Notifications' section shows an 'Unsubscribe' button.

REFLEKSI

Selama mengerjakan tugas kolaborasi menggunakan GitHub, kami jadi lebih memahami cara kerja tim dalam mengembangkan program secara bersama-sama. Dengan adanya branching, setiap anggota bisa mengerjakan fitur masing-masing tanpa mengganggu kode utama maupun

pekerjaan anggota lain. Pull request membantu kami dalam proses penggabungan kode ke branch utama karena kode dapat dicek terlebih dahulu sebelum di-merge. Selain itu, code review juga bermanfaat untuk saling memberikan masukan dan memastikan program berjalan dengan baik. Kendala yang kami alami adalah terjadinya conflict saat merge pull request karena ada beberapa perubahan pada file yang sama. Untuk mengatasinya, kami melakukan pull dari branch main terlebih dahulu lalu memperbaiki conflict secara manual sebelum melakukan push kembali. Dari tugas ini kami belajar pentingnya komunikasi dan pembagian tugas dalam kolaborasi menggunakan GitHub.
